

Certificate of Security

Penetration Test Cat4

Certificate issued to

Cataligent Projekt GmbH, Düsseldorf and Köln

for successfully passing a penetration test according to the guidelines of the German Federal Agency for Security in Information Technology (BSI) for performing penetration tests and in compliance with the requirements of the international security norm ISO/IEC 27001.

Methodology

36 areas of vulnerability were thoroughly checked by combining state of the art software, hardware and know-how in an attempt to breach security using penetrative means

Results

- No vulnerabilities of the severity class “high” or “medium” were identified.
- Only 3 “low” severity items were detected.
- Cat4 obtains the rating “very secure”.
